Advantages

OB-Managed Journey

Our physicians manage our Surrogates' journey throughout the entire process, not just during the IVF Phase.

Proprietary Pre-Screening Processes

Our OB-designed protocol ensures that all pregnancy and delivery records are reviewed before a surrogate is accepted into our program.

Records are reviewed by a seasoned OB to ensure the pregnancy is not only safe for the surrogate but will lead to the best possible outcome.

OB-Ordered Lab Testing

Allows our intended parents and surrogates to benefit from additional testing that may be otherwise omitted.

Our physicians will order these tests in advance, so the surrogate isn't left to make these decisions on her own.

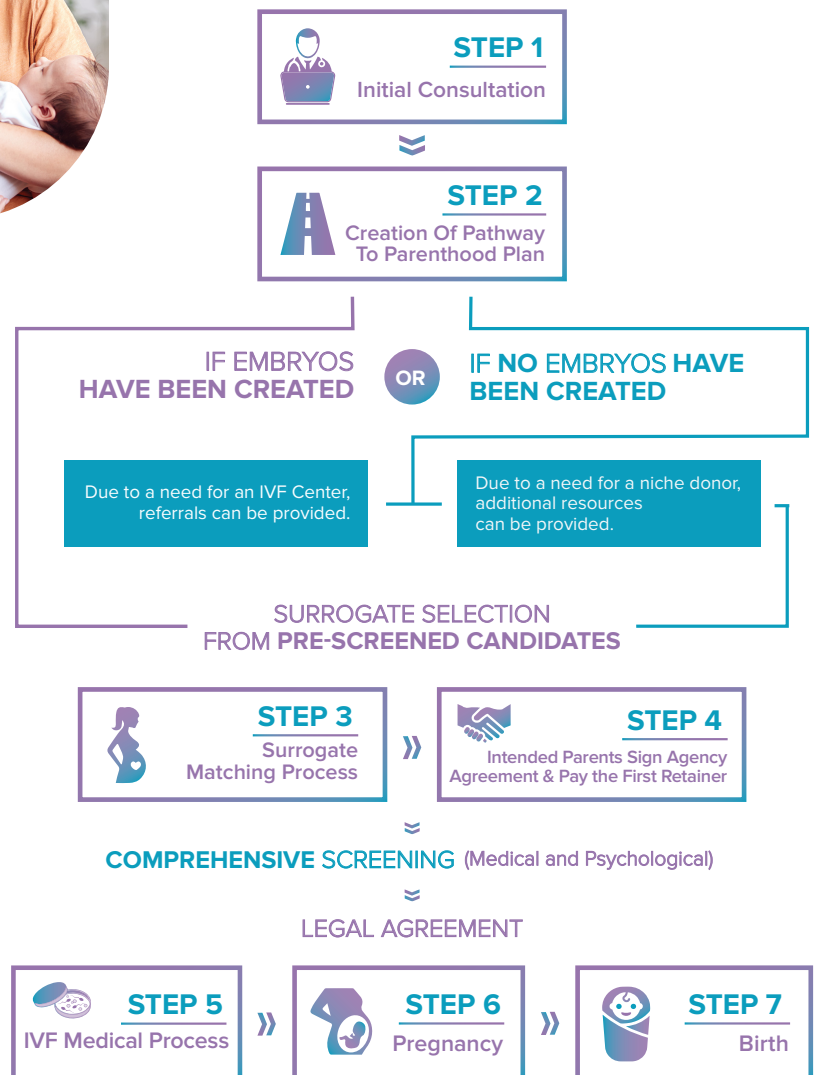

Transparent Physician-Monitored Reporting

Intended Parents and surrogates directly communicate with our in-house physicians.

Our surrogates will not need to give medical updates to the intended parents during the journey, we will send detailed reports to our intended parents weekly.
